EDUCATION

University of California, San Diego - B.S. in Computer Science | GPA 3.91/4.00 06/21

Relevant coursework: Data Structures and Algorithm, Software Engineering, Operating Systems, Data Science, Recommender System and Web Mining, Web App Performance, Computer Security, Design for Development

WORK EXPERIENCE

Software Engineer - Boku, San Francisco | [Web](#) 08/21 - Present

Software Engineer Intern - Analytical Flavor Systems, New York | [Web](#), [Android](#), [iOS](#) 08/20 - 10/20

- Incorporated a project tracker system to instantly notify tasks, reducing project duration by 20 work hours.
- Streamlined QA reports generation and revision interface to maximize software development lifecycle by automating 5 manual steps and centralizing documents for easier management.
- Enhanced flavor review interface to specify texture per food component and increase flavor profile data granularity, allowing for greater prediction accuracy.
- Completed other features developments, database schema designs, bug fixes, code reviews, QA tests on Gastrograph AI web and mobile apps using **React**, **Redux**, **React Native**, **GraphQL**, and **PostgreSQL**.

Web Developer Part-Time - UCSD Information Theory and Application Center | [Web](#) 12/19 - 02/20

- Refined homepage and registration system for ITA Workshop 2020 using **React** and **Django**.
- Formed a new database model to store bigger participant data, conserving 5000+ registration information.

Application Developer Intern - IBM Indonesia | [Web](#) 08/19 - 09/19

- Implemented an Applicant Tracking System design mockup using **Angular** with **Node.js** and **Express** back-end integration, enabling the electronic handling of recruitment for 1000+ applicants every year.

Full Stack JavaScript Developer Intern - Bizzy Indonesia | [Web](#), [Android](#) 06/19 - 08/19

- Remodeled Daily Commercial Report Portal using **React** to improve web functionality and speed to 75%.
- Visualized and renewed queries for sales and stock reports, amplifying data quality of 30+ client companies.
- Pitched and created a loyalty program feature for the TokoSmart mobile app in **React Native (TypeScript)**.

PROJECTS

Automated Gene Target Report Card for Inflammatory Bowel Disease | [Web](#) 01/20 - 06/20

- Designed and developed an end-to-end web application in **Figma**, **React**, **Node.js**, **Express**, and **MongoDB** that evaluates gene therapeutic potentials to help scientists find drugs in a time- and cost-effective manner.

Sports Networking Web Application | [Web](#) 03/20 - 06/20

- Originated the UI/UX design and front-end code structure with back-end APIs integration to build a sports networking platform using **React**, **Django**, **Firestore Authentication** and **Hosting** in an Agile team of 10.

UCSD Website Performance Remediation | [Report](#) 05/20

- Boosted UCSD mirror site performance score to 70% by modifying render-blocking font files, optimized images, reduced latency by utilizing CDN, byte-shaved, deferred, minified, extracted critical JS and CSS files.

LEADERSHIP EXPERIENCE

President of Women in Computer Science Club at Diablo Valley College | [Web](#) 08/17 - 05/19

- Aligned 58 members of WiCS to win 4 awards at hackathons, expanding club membership by 80%.
- Coordinated **DVCHacks**, a 24-hour pioneer hackathon with 4 technical workshops sponsored by Google and Amazon engineers, earned DVC's Best Event of the Year 2018-2019 with a total of 88 participants.
