EDUCATION

University of California, San Diego - B.S. in Computer Science | GPA 3.91/4.00 **Expected 06/21**

Relevant coursework: Data Structures and Algorithm, Software Engineering, Operating Systems, Data Science, Recommender System and Web Mining, Web App Performance, Computer Architecture, Design for Development

WORK EXPERIENCE

Software Engineer - Analytical Flavor Systems | [Web](#), [Android](#), [iOS](#) **08/20 - 10/20**

- Developed a project tracker system to instantly notify tasks as they become actionable, reducing project duration by 20 work hours on average.
- Designed a user interface to automate generated reports QA process, increasing team productivity by saving more than 5 manual steps and centralizing documents for easier management.
- Redesigned flavor review interface to allow specifying texture per food component to increase flavor profiles data granularity, allowing for greater prediction accuracy.
- Performed other feature developments, database schema designs, bug fixes, code reviews, QA tests on Gastrograph AI web and mobile app using **React**, **Redux**, **React Native**, **GraphQL**, and **PostgreSQL**.

Web Developer - UCSD Information Theory and Application Center | [Web](#) **12/19 - 02/20**

- Rebuilt the homepage and registration system for ITA Workshop 2020 using **React** and **Django**.
- Created a new inherited database model to store 5000+ participants data from the workshop registration.

Application Developer - IBM Indonesia | [Web](#) **08/19 - 09/19**

- Implemented an Applicant Tracking System design mockup using **Angular** with **Node.js** back-end integration, enabling the electronic handling of recruitment for 1000+ applicants every year.

Full Stack JavaScript Developer - Bizzy Indonesia | [Web](#), [Android](#) **06/19 - 08/19**

- Remodeled Daily Commercial Report Portal using **React** to improve web functionality and speed to 75%.
- Visualized and renewed query for sales and stock reports increasing data quality of 30+ client companies.
- Pitched and developed a loyalty program feature for TokoSmart mobile app in **React Native (TypeScript)**.

PROJECTS

Automated Gene Target Report Card for Inflammatory Bowel Disease | [Web](#) **01/20 - 06/20**

- Designed and developed an end-to-end web application in **React**, **Node.js** with **Express**, and **MongoDB** that summarizes genes therapeutic potentials to help scientists find drugs in time- and cost-effective manner.

Sports Networking Web Application | [Web](#) **03/20 - 06/20**

- Originated the UI/UX design and front-end code structure with back-end APIs integration to build a sports networking platform using **React**, **Django**, **Firebase Authentication** and **Hosting** in an Agile team of 10.

UCSD Website Performance Remediation | [Report](#) **05/20**

- Mirrored UCSD site and boosted its performance score to 70% by modifying render-blocking font files; optimized images; utilized CDN; deferred, minified, extracted critical JS and CSS files.

ACTIVITIES

President of Women in Computer Science at Diablo Valley College | [Web](#) **08/17 - 05/19**

- Managed 58 members of WiCS that have won 4 awards in hackathons, expanding club membership by 75%.
- Organized [DVCHacks](#), a 24-hour hackathon filled with 4 technical workshops sponsored by Google and Amazon engineers, acclaimed as DVC's Best Event of the Year 2018-2019 with a total of 88 participants.
